

SURROGACY

BY PONS MEDICAL GROUP

DEAR INTENDED PARENTS!

My name is **Edel Pons and I am the Founder of "Pons Medical Research"**. From my early medical and life experience I soon realized that millions of couples worldwide were facing the increasingly dramatic problem of infertility, problem which hurts the feelings, the pride and the honor of otherwise wonderful people, eager and able to become loving and caring parents.

For many families Surrogacy has become the last resort, a legal and ethical solution for serious health and fertility issues which offers the possibility to have their own child.

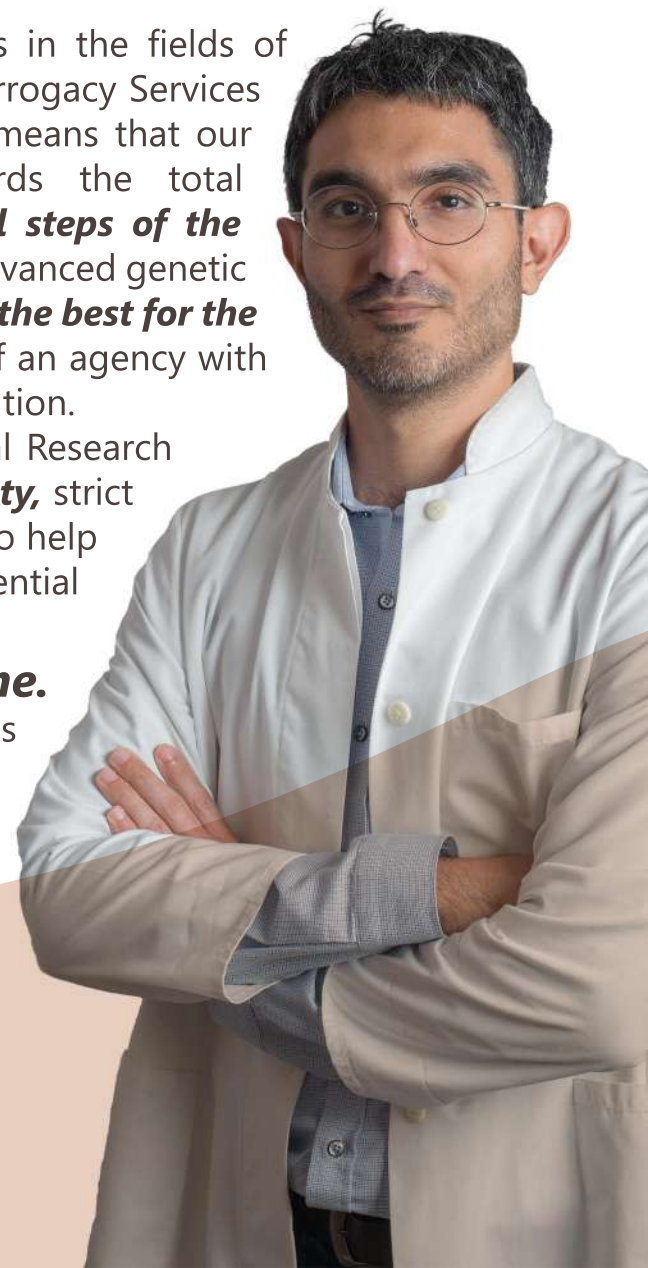

Our company, Pons Medical Research, specializes in the fields of Genetics and Reproductive Technologies. We offer Surrogacy Services with the philosophy of **"all under one roof"**, what means that our services are comprehensive and oriented towards the total satisfaction of our customers, **assisting them in all steps of the surrogacy process**, from the simplest legal issues to advanced genetic tests and complex medical treatments. **We work with the best for the best**, uniting the advantages, comfort and flexibility of an agency with the responsibility and effectiveness of a medical institution.

As a **Socially Responsible** company, Pons Medical Research performs its activities with the **highest levels of quality**, strict confidentiality and total transparency. Our mission is to help families from all around the World to fulfill the essential goal of the family: **to bring on new life**.

In a global world you couldn't be alone.

We kindly ask you to think about the marvelous opportunity that entails feeling the joy of parenthood and motherhood. Let these feelings inspire you and your surrogacy journey with us!

Sincerely yours,
Edel Pons Suarez

Settlement of all necessary administrative aspects with you •

SUCCESS STORIES

CASE 1

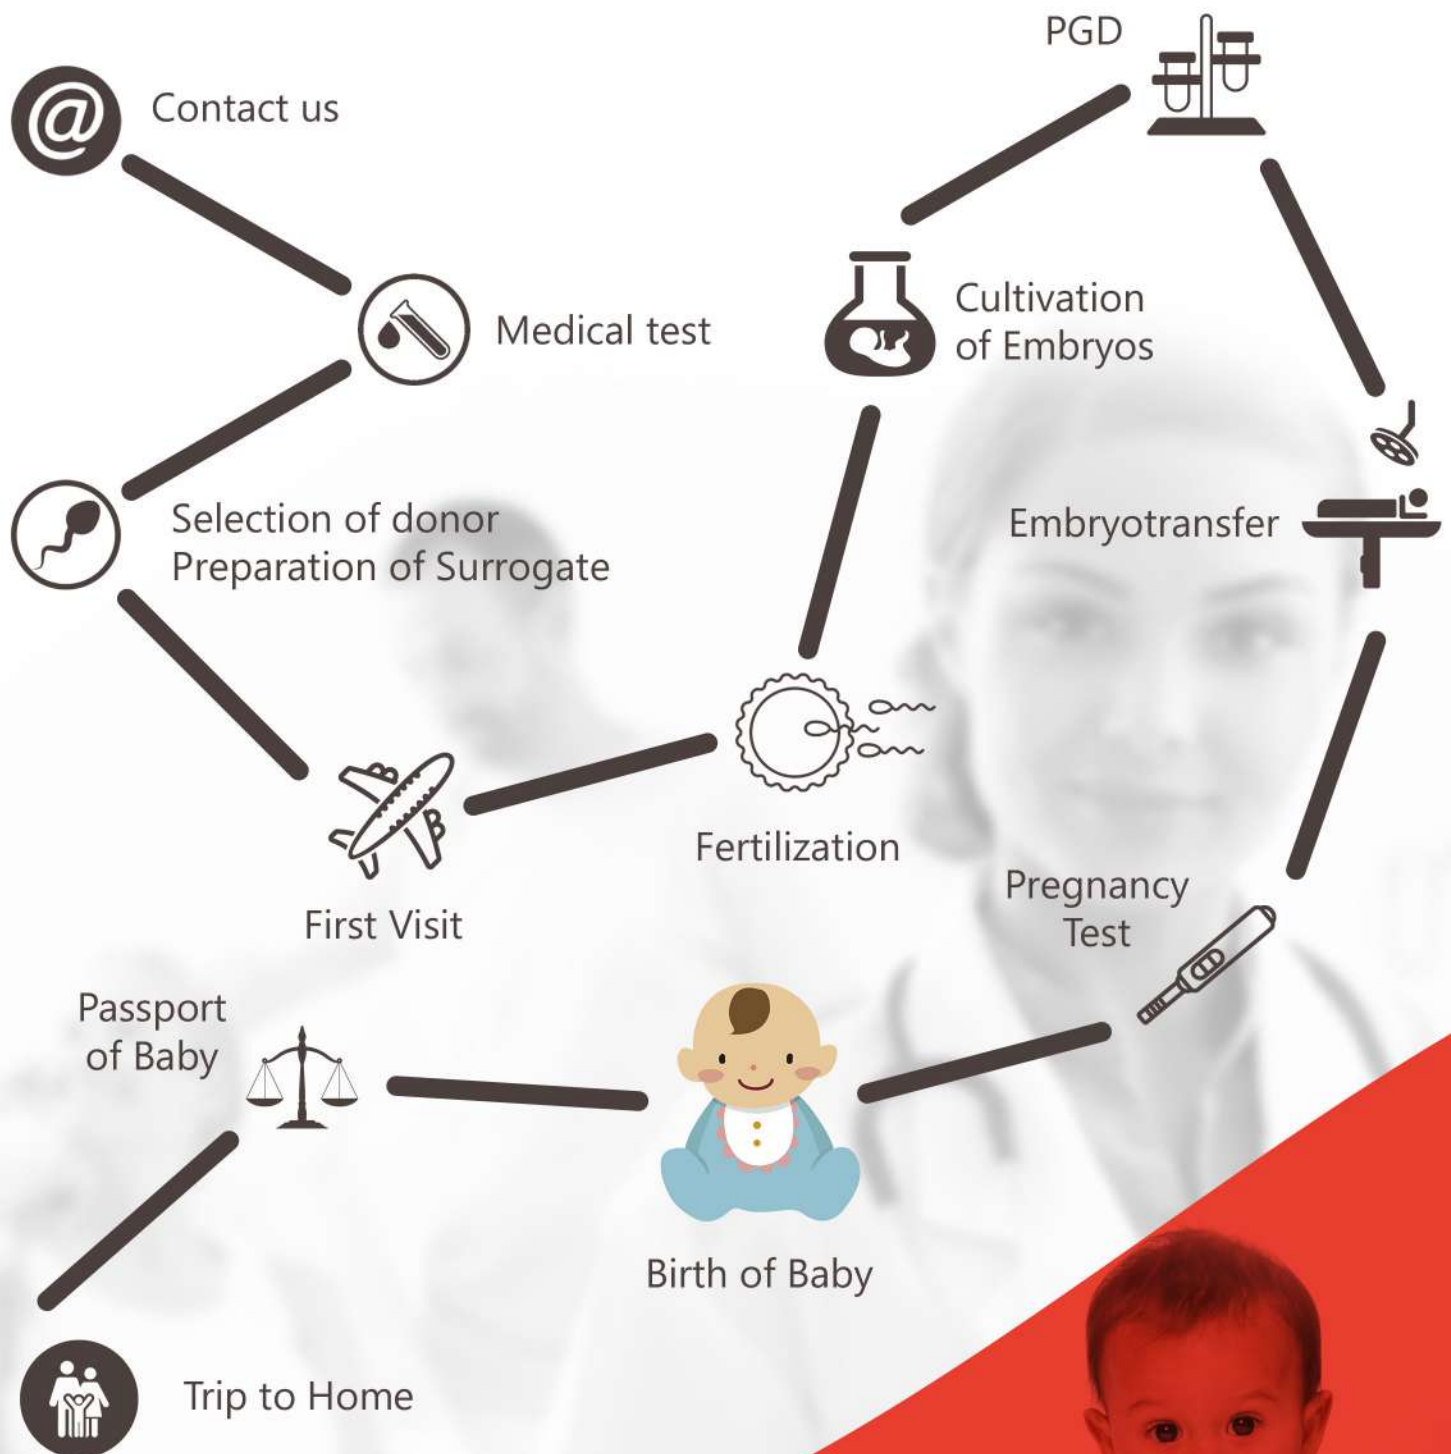

P AND M ARE A COUPLE FROM USA. THEY WERE TRYING IVF TREATMENTS FOR MANY YEARS WITHOUT SUCCESS. THE COUPLE WAS HOPELESS AND HAD EXPENDED HUGE AMOUNT OF MONEY IN THE PREVIOUS IVF TREATMENTS. WITH THE HELP OF THEIR FAMILY THEY TRAVELLED TO OUR CLINIC TO START A SURROGACY PROGRAM WITH US. THE PREGNANCY WAS ACHIEVED AT THE FIRST ATTEMPT. TWO LOVELY CHILDREN WERE BORN 9 MONTHS LATER. C-SECTION WAS PERFORMED AT DELIVERY. THE COUPLE IS VERY THANKFUL AND HAPPY WITH THEIR TWO NEW BORN MIRACLES.

CASE 2

C AND G ARE A COUPLE FROM CHINA. G CANNOT CONCEIVE AND THE COUPLE WAS FACED WITH THE CHOICE OF BEING CHILDLESS OR GO FOR SURROGACY. THEY FINALLY OPTED FOR SURROGACY, IN THIS CASE A GUARANTEED PROGRAM. THE PROCESS WAS EXTREMELY QUICK, IN LESS THAN A MONTH AFTER THEIR VISIT THE PREGNANCY WAS CONFIRMED! EVERYTHING WENT WITHOUT COMPLICATIONS AND 9 MONTHS AFTER 2 BEAUTIFUL CHILDREN WERE BORN. THE BOY WAS BORN NATURALLY, BUT THE GIRL NEEDED C-SECTION. OUR EXPERIENCED DOCTORS MADE AN URGENT C-SECTION IN THE MOMENT OF DELIVERY AND BOTH CHILDREN WERE SAVED! THE COUPLE IS EXTREMELY HAPPY AND THANKFUL FOR OUR HELP!

STAGES OF THE SURROGACY PROGRAM

STEPS OF THE SURROGACY PROGRAM

First step: Free medical consultation

- Make your initial medical examination. First of all, we need: spermogram, HIV test, medical history of Intended Mother and Father.
- Send it to our specialist with the description of your problem.
- Receive free medical consultation about your specific case and plan of treatment.

Second step: Legal consultation

- Send us legal details of your case (copy of your passports and marriage certificate)
- Get the details from our lawyer about the legal part of your surrogacy journey and a plan of going home with the new-born baby.

Third step: Before you come

- Let's make a plan for your individual surrogacy program.
- Book the tickets for the first visit to the country of surrogacy.
- Let us know about the date you plan to visit us and get your schedule for the first visit.

Four step: During the first visit

- Visit us personally and sign all necessary documentation for your surrogacy journey.
- Visit our Doctor and give him your biological material.
- Go home and wait until your baby is born.

Five step: Waiting for a baby

- During the whole period of surrogate mother's pregnancy you will get updated information about the process via e-mail, including monthly reports of the process with medical documentation and photo/video recordings.

Six step: Second visit

- Come back to us and hug your baby!
- Get the certificate of birth, where you are written as legal parents.
- Go with our lawyer to the Embassy of your country and get the citizenship of your baby.
- Get the passport of the baby in the Embassy and come back home with your baby.

YOUR SURROGACY PROGRAM IS FINISHED!

LEGAL ASSISTANCE

Surrogacy services in countries like Georgia and Armenia enjoy worldwide popularity thanks to a flexible and liberal legislation, effective legal support and high quality medical services. At this moment, these countries have the most advanced and transparent Surrogacy Laws on a global basis.

Being forbidden in many countries, Surrogacy has become closely intertwined with legal engineering. That's why qualified legal assistance is an essential part of a successful Surrogacy program.

Our experienced lawyers will provide you with comprehensive legal support from the moment of signing a contract with us and till your trip home with your baby.

At the delivery of the baby, all Intended parents will receive the Birth Certificate where they appear as sole legal parents without any mentioning to the surrogate mother. Our legal staff will assist you in dealing with the consular authorities to ensure your early return home and prevent any difficulty in getting the passport of the child.

OUR SURROGATES

As a Specialized Surrogacy Company, we understand that the Surrogate Mother is the most important person in the surrogacy program. That's why our staff is focused on finding the most appropriate and motivated Surrogates according to your individual needs and requirements. During this process, our Company takes into consideration several factors when reviewing the application of a prospective surrogate mother.

All our surrogates are in the range of 25-39 years old and need to pass several medical and psychological tests successfully. In addition to that, a prospective surrogate mother must have a healthy child and confirm that she has had normal pregnancies in the past. We make sure that our Surrogate Mothers enjoy good health and natural lifestyles to guarantee their ability to carry a healthy child to term without complications.

As a matter of fact we take great care of Surrogates Mothers and do our best to make them feel comfortable and happy. We also involve their families in the Surrogacy process so that they are always able to receive a strong emotional support.

The story of Ada

Hello! My name is Ada. I'm an entrepreneur and I have always been an active and a healthy person. My husband is a builder. We are nurturing our wonderful daughter and we like to travel all together, the whole family.

Few years ago my relatives met with the sad fact that they were unable to have a baby. While supporting them, I visited many Clinics and I was really surprised to find out how many women are unable to become a mother. That's why I decided to become a surrogate and help at least someone to feel the happiness of parenthood. Plus, it helps to be more stable financially.

The staff of Pons Medical Research is very friendly and attentive, they are responsive and kind, and that is very very important during the pregnancy period!

I was surprised that they were so responsible and attentive in comparison with other companies, they really care about pregnancy in a professional way.

I would definitely participate again in a Surrogacy Program from Pons Medical and with great pleasure!
